

## ***FORESTRY SHORTCOURSE***

Over the past few years, a number of teachers have taken the *Forestry Shortcourse*, a six-week, 18-hour program designed to give participants a basic orientation to forestry in north Idaho, and coach them in the development of a forest management plan for their property. Although the primary audience for this program is forest owners, teachers can take this class for their own professional development, and to better integrate local forest science and biology into the classroom. The U of I is offering **two UI credits** for the course. The dates and times are Thursday evenings; 6:30pm to 9:30 pm Nov. 1 to Dec. 13, 2007 (skip Thanksgiving week). Jon Wilkerson has registration forms if you are interested.
