Post Falls Elementary School Mentoring Program
Parent information and permission form

Post Falls School District is offering a unique opportunity for your child to become involved in its Mentoring Program. This program is designed to enhance your child's social, academic and personal development.

Children in grades one through five will be eligible to spend at least one hour a week with a mature, responsible community volunteer mentor, during school hours. Parent(s) or school personnel may recommend students for the mentoring program. Following the receipt of parental permission, a student may be matched with a mentor.

The adult mentor will be screened, trained, and matched with children who might benefit from individual attention through tutoring and recreational activities. We ask all mentors to commit to a regular weekly visit with the same child for at least the current school year.

Under no circumstances shall the mentor meet with the child except at activities sponsored by the school.
